Connecting communities

We bring artists to your doors

Art guidance for all

We empower local neighborhoods by hiring artists within their communities to reach out and share their abilities! Arts in CT understands the vision of skills and knowledge that are expected from today's students.

Live up to the hype

We provide them with a unique opportunity of an alternative pathway to success through the arts. Our lesson plans are developed as a distinctive form of support to help ensure that all students can learn new standards regardless of their learning style.

Outreach programs
Arts in CT combines S.T.E.A.M (Science, Technology, English, Arts and Math) to our curriculum so we understand that not every student can easily connect with what they are learning in the classroom! The entire concept behind Arts in CT is to combine S.T.E.A.M. or the Common Core with our programming to show students that abilities in these subjects can be developed through the arts. This will not only advance them in their classes at school, but will also start them down the path to college and career readiness. We provide Common Core–aligned programming tailored to a school’s needs and with fully customizable classes! In addition, we are happy to collaborate the experience students have with our artists in their after-school programs and produce a showcase or theatrical production for the entire student body.
SCHOOL ASSEMBLIES

Connecting Dreams

Are you looking for a different type of assembly for your school? We offer educational school assemblies on topics of your choice which will be presented by a specially selected group of talented artists. Let us help your students prepare for their Connecticut Aptitude Placement Testing (CAPT) or Connecticut Mastery Test (CMT) in a unique way! Our assemblies will get students out of their seats singing and dancing which will raise their overall morale when it comes to standardized testing time.

DAYCARE AND PRESCHOOL PROGRAMMING

In Arts in CT, there is "No Tot" left behind! Your preschooler will get a chance to create on their own canvas as they sing, dance, act, paint exercise and play their hearts out under the instruction of our dedicated artists. Your little ones will be excited by age-appropriate activities that are targeted to introduce and improve literacy, math and social skills through their involvement in the arts.

SUMMER PROGRAMS

THEATER CLASSES
Theater/Junior Theater Classes

Our theater teachers lead students of all ages with a variety of theater techniques and give them an opportunity to perform in front of their peers while teaching stage presence for both straight plays and musical theater. Classes range in level based on age and experience. Basic classes include a general introduction to theatre, with theater games as well as class exercises in acting.

Theater Workshops

In Theater Workshops, the class or director usually selects a theatrical work to focus on. They apply higher-level thinking to analyze characters and the choices they make, figure out which character they find themselves connecting with and work with classmates to present a showcase of their own interpretation of the show they selected.

Storytime Theater Class

The theater director leads a read-a-long with the class as they go on an adventure through the book. They then take the book using common core standards and bring it to life. Built on the mindset behind the common core, the class is asked to apply higher-order thinking and open their perception and knowledge to real life plays. This class is essential for early learners and those children who would like to increase their reading levels and motor skills.

In addition, this class is fundamental for any students preparing to audition for a theatrical production of any type.

Puppetry Class
